

H41 INTERCEPTOR WITH DUPONT™ NOMEX® NANO FLEX

H41 Interceptor particulate blocking hoods reduce firefighters' exposure to persistent fire ground carcinogens and other contaminants.

Certified to NFPA 1971

OFFERS PBI® PROTECTION FOR MAXIMUM PERFORMANCE

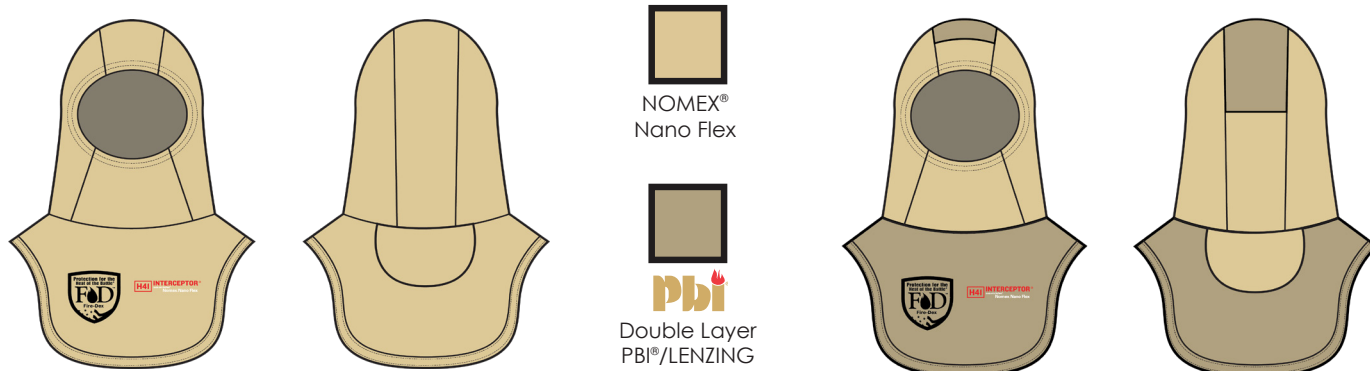

Features DuPont™ Nomex® Nano Flex particulate-blocking technology laminated between two layers of 6.0oz PBI®/Lenzing (20%/80%).

AVAILABLE IN:

- Two Styles: Total Coverage and Zone Coverage
- The Interceptor Package

WHEN A HOOD IS MORE THAN A HOOD

TOTAL COVERAGE

Our total coverage option satisfies more than the minimum NFPA requirement by carrying the particulate blocking technology throughout the entire hood including, the neck, ears, jawline, side, and top of the head, as well as the SCBA interface and bib.

ZONE COVERAGE

For those seeking great protection at a lower price point, we offer a zone coverage option that focuses primarily on the highly-permeable areas of your skin, around your face and neck. This hood design meets the NFPA standard for minimum area of coverage.

UNMATCHED BREATHABILITY COMPARED TO MOISTURE BARRIER TECHNOLOGY

This hood provides the greatest situational awareness while keeping you and your crew safe from potentially harmful carcinogens.

- Maintains excellent flame and heat resistance
- TPP of 37.5 and THL of 388
- Comfortable, thin, and lightweight

Air Permeability
